

Hamza Khan

Senior Ruby on Rails Engineer · SaaS & API Specialist

hamza.ror.dev@gmail.com · [+92 300 4339374](tel:+923004339374) · hamzaror.github.io · linkedin.com/in/hamzaror · Lahore, Pakistan

SUMMARY

Ruby on Rails engineer with **10+ years** building and scaling production SaaS, APIs, and billing systems. Designed backends serving **150k+ requests/day**, led **multi-CRM integrations**, and optimized **Sidekiq/Redis** pipelines for reliability and cost. Comfortable owning features end-to-end and mentoring teams. Recently added **AI-assisted flows** on Rails stacks (chat/scheduling, enrichment). Portfolio: hamzaror.github.io

CORE SKILLS

Ruby on Rails (v4–v8) Hotwire (Turbo & Stimulus) REST / GraphQL APIs RSpec / Capybara / Playwright Solid Queue / ActiveJob
PostgreSQL / SQLite / MongoDB Google Cloud Platform (GCP) ActiveStorage / Google Cloud Storage Kamal / Docker
CI/CD (GitHub Actions, Kamal Pipelines) JavaScript (ES6+) / React / Angular Stripe / PayPal / Twilio / Mailchimp
Agile / Scrum / GitHub Collaboration Rubocop / Clean Architecture / Code Reviews

WORK EXPERIENCE

Full Stack Engineer — Otterkin (Remote, UK)

Sep 2025 – Present

- Building **Otterkin Web**, a full-stack **Ruby on Rails 8** application deployed on **Google Cloud Platform (GCP)** using **Kamal** for containerized deployments.
- Developed backend modules for **users, artists, and commissions** (including nested activities, messages, and image uploads).
- Implemented secure authentication and session handling using token-based logic.
- Integrated **ActiveStorage** with **Google Cloud Storage** for image and file management, including thumbnail processing.
- Set up **Solid Queue** for background jobs and async workflows.
- Configured CI/CD, environment management, and deployment pipelines using **Kamal**, **Docker**, and **GCP Artifact Registry**.
- Followed **Rubocop** and clean architecture standards to ensure maintainability and scalability.

Senior Software Engineer — Hy.ly (Remote, US)

Aug 2020 – Jul 2025

- Scaled Rails SaaS handling **150k+ requests/day** for multifamily real estate clients.
- Built **AI-powered guided chat & scheduling** (Rails + GPT APIs) using **Mongoid** for modeling and **Sidekiq** for jobs.
- Integrated CRMs: **RentCafe, Resman, WelcomeHome, Knock, Salesforce**; hardened webhooks and retry semantics.
- Cut job queue latency by **~30%** via query tuning, batch jobs, and Redis config; reduced error noise with structured logging.
- Automated **zero-downtime Capistrano** deploys on AWS; mentored junior engineers and uplifted test coverage with **RSpec**.

Full Stack Engineer — GigaLabs

Jul 2019 – May 2021

- Shipped e-commerce & analytics dashboards in Rails + React; integrated **Stripe/PayPal**, shipments, and reporting.
- Delivered a Python-based **AI video detection** POC; productionized pipelines and alerts.
- Deployed on **Heroku/Docker**; supported client SLAs with 99%+ uptime practices.

Software Engineer — TechClan / AlgoRepublic / XoHo Tech

2017 – 2019

- Implemented B2B and IoT dashboards; built **Spree** commerce features, promotions, and order flows.
- Integrated **QuickBooks**, shipping carriers, and role-based reporting.

Software Engineer — BigInt Solutions

Jun 2014 – Jan 2017

- Developed campaign analytics and enterprise dashboards in Rails + PostgreSQL.
- Wrote custom API bridges and webhook listeners for CRMs and accounting systems.

PROJECT HIGHLIGHTS

- Hy.ly** — Rails lead funnel + AI scheduling with multi-CRM integration (**Mongoid, Sidekiq, Capistrano**).
- GoZiPLY** — Rails + React platform; Google Maps APIs, push notifications, cron jobs.
- CorkCRM** — Full billing: Rails + **QuickBooks, MX Merchant, Mandrill**, test suite with **RSpec**.
- Freshpicks** — Spree commerce; **Stripe** checkout, Paperclip uploads, Magento data migration, Heroku deployment.
